Pattern Programs PYTHON

PART-1

@python_world_in

1. Right-Angled Triangle Pattern

```
*
* *
* * *
* * * *
* * * * *
```

Program :

```
rows = int(input("Enter the row -
        size for the pattern:"))
for i in range (1, rows+1) :
    for j in range (1, i+1) :
        Print ("*", end = ' ")
    Print ()
```

2. Inverted Right-Angled Triangle Pattern.

```
* * * * *
* * * *
* * *
* *
*
```

Program :

```
rows = int (input ("Enter the row
        size for the Pattern:"))
for i in range (rows, 0, -1):
    for j in range (1, i+1):
        Print ("*", end = " ")
    Print()
```

3. **Pyramid pattern**

Enter the row size for the pattern : 5

```
    *
   * * *
  * * * * *
 * * * * * * *
* * * * * * * * *
```

Program :

```
rows = int (input ("Enter the row size for the pattern:"))
for i in range (1, rows+1):
    for j in range (rows -i):
        print (" ", end = " ")
    for k in range (1, 2 * i):
        print ("*", end =" ")
print ()
```

4. **Inverted pyramid pattern**

row size = 5

```
* * * * * * * * *
 * * * * * * *
  * * * * *
   * * *
    *
```

Program :

```
rows = int (input ("Enter the rows size for the pattern:"))
for i in range (rows, 0, -1):
    for j in range (rows -i):
        Print (" ", end = " ")
    for k in range (1, 2 * i):
        Print ("*", end = " ")
print ()
```

5. **Diamond Pattern**

Program :

```
rows = int (input ( " Enter the row
        Size for the pattern: " ))
for i in range ( 1, rows +1) :
    for j in range (rows -i) :
        Print (" ", end = " ")
    for k in range ( 1, 2 * i) :
        Print ( " * ", end = " ")
    Print ()

for i in range (rows -1, 0, -1) :
    for j in range (rows -i) :
        print (" ", end = " ")
    for k in range (1, 2 * i) :
        print ( " * ", end = " ")
    Print ()
```

Enter the row

Size for the Pattern

: 4

```
      *
    * * *
  * * * * *
* * * * * * *
  * * * * *
    * * *
      *
```

6. Hallow Square pattern

Enter the row site for the pattern :5

```
* * * * *
*       *
*       *
*       *
* * * * *
```

Program :

```
rows = int (input (" Enter the row
        Size for the pattern : "))

for i in range (1, rows + 1) :
    for j in range (1, rows + 1) :
        if i == 1 or i == rows or
            j == 1 or j == rows :
            print ("*", end = " ")
        else :
            print (" ", end = " ")
    print ()
```

7. Hallow Right-Angled Triangle

```
*
* *
*   *
*     *
* * * * *
```

Program :

```
rows = int (input ("Enter the row
        size for the Pattern : "))

for i in range (1, rows + 1) :
    for j in range (1, i+1) :
        if j == 1 or i == rows or
            i = = j :
            Print ("*", end = " ")
        else :
            Print (" ", end = " ")

    print ()
```

8. **Hallow Inverted Right-Angled Triangle**

```
*  *  *  *  *
*        *
*     *
*  *
*
```

Program :

```
rows = int(input("Enter the row
        size for the pattern:"))
for i in range(rows, 0, -1):
    for j in range(1, i+1):
        if j==1 or i==rows or
            i==j:
            print("*", end=" ")
        else:
            print("*", end=" ")
```

9. **Hollow pyramid**

```
        *
      *   *
    *       *
  *           *
* * * * * * * * *
```

Program :

```
rows = int(input("Enter the row
        size for the pattern:"))
for i in range(1, rows+1):
    for j in range(rows-i):
        print(" ", end=" ")
    for k in range(1, 2*i):
        if k==1 or k==2*i-1
            or i==rows:
            print("*", end=" ")
        else:
            print(" ", end=" ")
print()
```

10 Hollow Inverted Pyramid

```
* * * * * * * * *
*               *
  *           *
    *       *
      *   *
        *
```

Program :

```
rows = int(input("Enter the row
        size for the pattern:"))
for i in range(rows, 0, -1):
    for j in range(rows -i):
        Print(" ", end = " ")
    for k in range(1, 2 * i):
        if k==1 or k==2 * i-1 or
            i==rows:
            Print("*", end = " ")
        else:
            Print(" ", end = " ")
    Print()
```

11. Centered Full Number Pyramid

```
        1
      1 2 3
    1 2 3 4 5
  1 2 3 4 5 6 7
1 2 3 4 5 6 7 8 9
```

Program :

```
rows = int(input("Enter the row
        size for the Pattern:"))
for i in range(1, rows+1):
    Print(" " * (rows - i))
    print(end = " ")
    for j in range(1, 2 * i):
        Print(j, end = " ")
    Print()
```

12. Hollow Diamond Pattern

Program :

```
rows = int(input("Enter the row
        size for the pattern:"))
for i in range(1, rows+1):
    for j in range(rows-i):
        print(" ", end = " ")
    for k in range(1, 2*i):
        if k==1 or k==2*i-1:
            Print("*", end=" ")
        else:
            Print(" ", end = " ")
    Print()
for i in range(rows-1, 0, -1):
    for j in range(rows-i):
        Print(" ", end=" ")
    for k in range(1, 2*i):
        if k==1 or k==2*i-1:
            Print("*", end = " ")
        else:
            Print(" ", end = " ")
    print().
```

```
    *
   * *
  *   *
 *     *
*       *
 *     *
  *   *
   * *
    *
```

13. Number Right-Angled Triangle

Program :

```
1
1 2
1 2 3
1 2 3 4
```

```
rows = int (input ("Enter the row
        size for the pattern :"))
for i in range (1, rows+1):
    for j in range (1, i+1):
        Print ( j, end=" ")
    Print( )
```

14 Inverted Number Right-Angled Triangle

Program:

```
1 2 3 4 5
1 2 3 4
1 2 3
1 2
1
```

```
rows = int (intput( " Enter the
        row size for the pattern:"))
for i in range (rows, 0, -1):
    for j in range (1, i+1) :
        print (j, end = " ")
    print ()
```

15. **Inverted Number Pyramid**

Program :

```
rows = int(input("Enter the row size
        for the pattern: "))
for i in range(rows, 0, -1):
    for j in range(rows -i):
        Print(" ", end = " ")
    for k in range(1, i+1):
        Print(k, end = " ")
    for l in range(i-1, 0, -1):
        Print(l, end = " ")
    Print()
```

```
1 2 3 4 5 4 3 2 1
  1 2 3 4 3 2 1
    1 2 3 2 1
      1 2 1
        1
```
